

Lube, Oil & Filter (LOF) Service:
3,000 Miles

- Road test & written evaluation
- 41-point inspection service
- Drain & fill engine oil
- Replace oil filter
- Adjust tire pressure
- Check brakes
- Check & "top off" all fluid levels
- Lubricate suspension
- **Includes visual Inspection of:**
 - Brake fluid level & pH
 - Brake lines & hoses
 - Suspension & steering components
 - Exhaust system
 - PCV, emission system
 - Air & breather filter
 - Belts & vacuum & coolant hoses
 - Engine fan operation
 - Exterior lighting
 - Exhaust system

Minor Service:
15,000 Miles

- Road test & written evaluation
- 41-point inspection service
- Drain and fill engine oil
- Replace oil filter
- Install oil supplement
- Adjust clutch
- Check, clean, adjust brakes
- Rotate ties/adjust air pressure
- Service battery, including "corrosion" pads
- Top off all fluid levels
- Check A/C & heater operation
- Lubricate suspension, doors & hood
- Check spark plug condition
- Install fuel additive (remove carbon)
- Reset engine maintenance light
- **Includes inspection of:**
 - Brake fluid level & pH
 - Brake lines & hoses
 - Suspension & steering components
 - Exhaust system
 - PCV, emission system
 - Air & breather filter
 - Belts & vacuum & coolant hoses
 - Engine fan(s) operation
 - Exterior & interior lighting
 - Coolant protection and pH
 - Wiper blades
 - CV joints & boots

Major Service:
30,000 Miles

- Road test & written evaluation
- 41-point courtesy service
- Flush & replace engine oil
- Replace oil filter
- Lubricate suspension, doors & hood
- Flush & replace power steering fluid
- Flush fuel injection system*
- Replace fuel filter
- De-carbon engine
- Replace spark plugs
- Adjust clutch
- Check, clean, adjust brakes
- Flush & replace brake fluid
- Rotate tires/adjust air pressure
- Inspect & test battery
- Inspect & test charging system
- Check A/C & heater operation
- Replace air filter & PCV valve
- Complete transmission service
- Flush and replace anti-freeze
- Reset engine maintenance light

* Complete fuel system service additional.

- **Includes inspection of:**
 - Exhaust system
 - Brake lines & hoses
 - Emission system
 - Belts & vacuum & coolant hoses
 - Engine fan(s) operation
 - Suspension & steering components
 - Exterior & interior lighting
 - Wiper blades
 - Rear defroster operation
 - Strut & shock condition
 - Suspension springs
 - Engine/transmission mounts
 - Ignition wires
 - CV joints & boots

Automatic Transmission Service

Recommended every 12 months or 12,000 miles

80% of transmission failures are as a result of heat/fluid breakdown!

Road test vehicle, perform 41-point inspection, remove and clean transmission fluid pan, remove and open filter for examination, replace filter, replace pan gasket and fill with the appropriate automatic transmission fluid and check for leaks.

Complete Fuel System Service

Recommended every two years or 30,000 miles additional

Helps reduce emissions and improve fuel mileage!

Clean throttle body area; use Motorvac Fuel Injection System flush to clean fuel injectors; chemically clean intake manifold area and intake valves; replace fuel filter; introduce fuel additive to continue to clean entire fuel system, reduce engine carbon.

Complete Cooling System Service

Recommended every two years or 30,000 miles

Helps prevent catastrophic engine damage due to overheating!

Check all hoses and belts; pressure test system; check heater, defroster, cooling fan operation; flush and recycle antifreeze; fill cooling system with correct coolant (a 50/50 mixture); ensure proper pH balance; check for leaks; road test.

Air Conditioner Service

Recommended yearly

A slight problem caught early can save you time and money!

A/C performance test; check system pressures; check condenser and cooling fan operation; inspect all A/C components for wear, leaks and operation. Adding to or recharging the system is extra.

Brake Service (front or rear)

Recommend an annual inspection to determine wear and longevity

Waiting for brake failure symptoms costs more than routine brake services!

Remove and replace pads and/or shoes; resurface rotors and/or drums; inspect lines and components; test parking brake.

Brake Fluid Flush and Change

Recommended every 30,000 miles or as indicated by litmus test

Brake fluid "break down" and contamination causes component failure!

Flush old fluid; inspect reservoir and cap; inspect lines and fittings; replace fluid.

Power Steering Flush

Recommended every 2 years or 30,000 miles

Power steering fluid can "break down" causing pump or seal failure!

Complete power steering fluid flush. Inspect all components for wear and proper operation; Fortify fluid with power steering condition.

Maintenance, Replace Spark Plugs

As recommended by manufacturer

Helps maintain fuel economy and prolongs engine life!

Replace spark plugs. Check for engine fault codes, check idle and timing specifications.

Motorvac Fuel Injection Flush

Recommended every 2 years or 30,000 miles

Directly improves gas mileage!

Helps reduce emissions and improve driveability and fuel mileage. Clean throttle body area, clean intake manifold and intake valves, clean fuel injectors and removes carbon.

Computer/Electronic/Electric/Hydraulic/Mechanical Diagnostic Service

A "Check Engine", "Service Engine Soon" or other trouble light evaluation

Our "Test, Don't Guess" philosophy insures an accurate diagnosis for today's complex vehicles which goes towards preventing the installation of unneeded parts. In addition, we continue to invest in the most advanced diagnostic and test equipment and training for our technicians. A constantly updated DVD-based information system provides current technical bulletins and the most up-to-date repair procedures for our ASE-Certified Technicians. This way, we can provide our customers the most cost-effective and timely repairs for their vehicles.
